TECHNICAL TEST ANALYST
CERTIFICATE IN SOFTWARE
TESTING**

ISTQB ADVANCED LEVEL TECHNICAL TEST ANALYST CERTIFICATE IN SOFTWARE TESTING

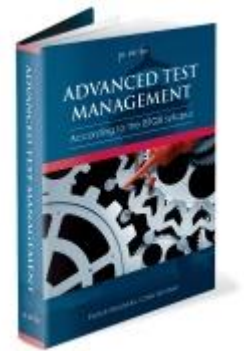

Introduction

The International Software Testing Qualifications Board ([ISTQB](#)) consists of Member Boards representing countries or regions around the world.

Next to the Foundation Level Certification, ISTQB has an Advanced Level Certification divided over three modules:

- Advanced Level Test Manager
- Advanced Level Test Analyst
- Advanced Level Technical Test Analyst

In order to contribute to the objective of gaining recognition for testing as an essential and professional software engineering specialization, we proved to ISTQB our ability to teach the appropriate syllabus material, using competent staff, good materials and an appropriate training environment in view of the ISTQB Advanced Level Test Analyst Certificate in Software Testing based on the ISTQB syllabus.

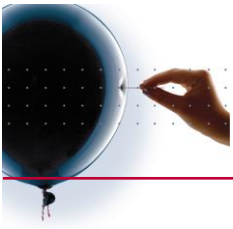

As Accredited Training Provider, ps_testware offers a three day course leading to the certificate, awarded by ISTQB to those who pass the exam.

Intended audience

People who have advanced in their software testing career and want to certify on a higher level. This includes test managers, test analysts, test engineers, but also developers and system analysts.

Candidates must hold the ISEB/ISTQB Foundation Certificate in Software Testing.

Course outline

The table below provides a high-level overview of the course content. You can download a detailed [syllabus](#) from the ISTQB website.

Day 1

- Risk Based Testing
- Reviews
- Structure Based Test Techniques

Day 2

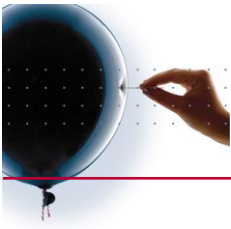

- Static Testing
- Dynamic Testing
- Software Quality Characteristics

Day 3

- Test Tools
- Test Approach Case

Specifics

- Participants must hold the ISTQB Foundation Certificate and a declaration of 18 months experience in testing.
- Participants should be informed that a minimum of *8 hours self study* will be needed between sessions.
- The certification exam will be scheduled approximately 2 weeks after the 3rd day of the course.

ISTQB ADVANCED LEVEL TECHNICAL TEST ANALYST CERTIFICATE IN SOFTWARE TESTING

On completion participants will

- Structure the tasks defined in the test strategy in terms of technical requirements;
- Analyze the internal structure of the system in sufficient detail to meet the expected quality level;
- Evaluate the system in terms of technical quality attributes such as performance, security, etc.;
- Prepare and execute the adequate activities, and report on their progress;
- Conduct technical testing activities;
- Provide the necessary evidence to support evaluations;
- Implement the necessary tools and techniques to achieve the defined goals.
